## Large Countries

### 2.

How to use WHERE to filter records. Show the name for the countries that have a population of at least 200 million. 200 million is 200000000, there are eight zeros.

## Introduction

### 1.

Read the notes about this table. Observe the result of running this SQL command to show the name, continent and population of all countries.

Greece has capital Athens.

Each of the strings 'Greece', and 'Athens' has 6 characters.

Show the name and capital where the name and the capital have the same number of characters.

```
SELECT name | EET(name 1) | capital
